THE GREEN NEIGHBORHOOD:

YOUR GREEN STORMWATER INFRASTRUCTURE RESOURCE CENTER

Green stormwater infrastructure is an approach to managing stormwater by either enabling it to infiltrate into the ground where it falls or by capturing it for later reuse.

**Green Infrastructure
can save you time and money!**

Learn how!

ATLANTIC BUILDERS CONVENTION
April 11 & 12, 2018
Atlantic City Convention Center
Atlantic City, NJ

Calling all Developers!

The 2018 [Atlantic Builders Convention](#) will feature a special area on the convention floor called the **Green Neighborhood: "Your Green Stormwater Infrastructure Resources Center,"** where project developers can engage in **FREE** rapid-fire consulting sessions with stormwater management experts on how to incorporate green infrastructure technologies into development projects.

Register today to confirm your FREE consulting appointment!

Confirmed Speed Consultants:

Ed Confair PE, RLA, [Engineering and Land Planning](#)

Brian Friedlich, PE, [Kleinfelder](#)

Michael Sullivan, AICP, PP, [Clarke Caton Hintz](#)

For your speed consulting session, please bring:

- Concept plan and site survey (hard copy)
- Pictures of the site such as Google Earth map (hard copy)
- Local zoning information (bulks, buffers, minimum parking requirements)

Please also bring, if available:

- Geotechnical information
- Flood Hazard area information
- Wetlands information

Click here to [sign up for a free consulting session](#).
